DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by WO 01/34298.

WO 01/34298 discloses a process for preparing an oxide containing Si and Ti wherein the oxide material is contacted with at least one silane or silane derivative (page 8, line 20 – page 9, line 15). Suitable silanes include trimethylchlorosilane (page 25, lines 10-22). Suitable oxide materials include MWW zeolite and MCM-22 is specifically mentioned (page 4).

The intended use limitations of the catalyst recited in claims 3-8 are noted by the examiner. While intended use recitations cannot entirely be disregarded, in composition and article claims, the intended use must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention over the prior art. *In re Casey*, 370 USPQ 235 and *In re Otto*, 312 USPQ 458. It is the position of the examiner that the prior art structure is capable of performing the intended use and therefore meets the instant claims.

As each and every element of the claimed invention is taught in the prior art as recited above, the claims are anticipated by WO 01/34298.
